

# Amani MEFTAH

## Full Stack Engineer | Python (Django) | React

Full Stack Engineer (Python/Django, React) holding a Master's degree in Computer Science. Proven hands-on experience building production-ready web applications (high-performance REST APIs, robust data models, reactive UI). Experienced in integrating and deploying custom applied AI solutions (RAG, LLM). Autonomous, detail-oriented, and immediately available for full-time permanent positions .

### WORK EXPERIENCE

#### Full Stack Developer — Intern

From Mar. 2025 to Aug. 2025 CTC groupe Lyon, France

##### Project 1: Internal Research Program Management & Scheduling Tool

- Developed and maintained an internal web application **used by 100–150 active users** to manage and schedule research programs.
- Designed and optimized **REST APIs and** relational database schemas.
- Gathered business requirements from cross-functional teams and successfully delivered **5+ key production features**.
- Engineered an automated financial statement generation module.
- Ensured code quality through internal server testing and **Agile collaboration** via GitHub (code reviews, branching strategy).

**Tech Stack : Python, Django, MySQL, SQLite, JavaScript, GitHub**

##### Project 2: Automated Report Generation Tool

- **Autonomously designed and developed** an application generating automated reports from complex Excel datasets, **reducing processing time by 99.9%**.
- Managed end-to-end delivery: collected client requirements, drafted functional specifications, and executed full development.
- Designed and built an intuitive, **dynamic user interface (UI)**.
- Structured a robust and maintainable **backend software architecture**.
- Performed **unit testing** and deployed the application onto the internal company server.

**Tech Stack : Python, Django, JavaScript, SQLite, HTML/CSS, Figma.**

#### Full Stack Engineer

Since 2025 Freelance France

##### Project 1 : Automotive Appraisal Firm Website

- Designed and built a responsive, **bilingual** (FR/AR) showcase website.
- Developed a contact form integrated with **WhatsApp API** and real-time notifications.

**Tech Stack: React, TypeScript, Tailwind CSS, Figma**

##### Project 2: Jewelry E-Commerce Platform (In Progress)

- Created UX/UI designs on Figma and defined overall system architecture .
- **Drafted functional specifications** with the client and established technical stack setup.

**Tech Stack: Python, React, TypeScript, Tailwind CSS, Figma**

#### Python Developer — Intern

From Jun. 2021 to Aug. 2021 Medical Analysis Laboratory Tunisia

- **Co-developed** an automation system for biological data processing and analysis.
- **Tested and validated** analytical results in close collaboration with the laboratory team.

**Tech Stack : Python**

### PERSONAL PROJECTS

#### Local Chatbot

- Built a **REST API featuring** a Retrieval-Augmented Generation (**RAG**) architecture to query PDF documents using natural language, running fully locally to ensure **100% data privacy**.
- Handled text document extraction, chunking, and vector embedding generation.

**Tech Stack: Python, FastAPI, LangChain, Ollama, PostgreSQL**

#### Personal Portfolio

- Designed and developed a modern, responsive web portfolio showcasing projects and technical skills, deployed with continuous integration on Vercel.

**Tech Stack: React, JavaScript, Tailwind CSS**

#### Internal Messaging System (WhatsApp-style)

- Designed a **real-time REST API** supporting messaging, notifications, and user management.
- Modeled **relational databases** and secured **client-server communication** with strict validation and error handling.

**Tech Stack: Java, Spring Boot, PostgreSQL**

### EDUCATION

#### Master's Degree Mathematics & Computer Science

From 2023 to 2025 Université Grenoble Alpes Grenoble, France

### TECHNICAL SKILLS

#### Front-End Development

- HTML/CSS, JavaScript, TypeScript
- React, Tailwind CSS

#### Back-End Development

- **Python**, Django, FastAPI
- **Java**, Spring Boot

#### Databases

- MySQL, SQLite, PostgreSQL

#### Operating Systems

- Linux, Windows, macOS

#### Artificial Intelligence

- LLM, RAG, LangChain, Ollama

#### Tools

- Git
- GitHub
- APIs REST
- Figma

#### Methodologies

- SCRUM / Agile
- Jira

### LANGUAGES

#### French

Fluent

#### English

Fluent

#### Arabic

Native

### CERTIFICATIONS

#### AWS Technical Essentials

AWS

#### Foundational C#

FreeCodeCamp, Microsoft
